5/5/2017-wants to insall POU -6/27/2016: SPCA WS- they said they were having difficulty with the regional sewer plant taking the waste so they are installing drying beds. 11/3/2015-Waiting to see if nearby system with installed treatment can resolve waste discharge issue		
5/5/17-wants to install POU-will start process now that Monterey County will consider approving-6/27/2016: They want POE, which is not allowed for compliance purposes by our local oridinace. However, since the state is developing POE/POU regulations, Monterey county is considering amending the ordinance so this may become a viable option if they meet the critera. 12/24/2015-The compliance order has been updated and the initial compliance plan is due December 31, 2015. System is looking into treatment

<p>1/31/2017- Updated enforcement was issued. System has new superindendent who is moving forward with treatment system and who will start communication with Grange.</p> <p>6/27/2016: System has indicated desire to stay on bottled water. Updated enforcement will be issued in July 2016 indicating bottled water is not long term solution. 5/11/16-Plans have been completted. Principal is interested in staying on bottled water so an updated compliance order is in process. 12/1/2015-The project is moving. Peter Haase at Fall Creek said he would deliver the Plans and CEQA documents by this week, but DFA has not received the documents yet. Back in September/October, the new Superintendent had concerns on the monthly operating costs and he was going to discuss with the School Board. Construction most likely it will be funded with DWSRF and/or Prop 1 money. 11/3/2015-engineered plans for full scale treatment plant completed. 6/1/2015-Pilot test completed and approved by state. Currently working on engineered plans for full scale treatment plant</p>		
<p>5/5/2017-wants to move forward with POU.</p> <p>6/27/2016: blending is no longer viable option since futher testing showed the other well also is high in arsenic. The system missed deadline for compliance plan so enforcement is pending. 12/24/2015-The compliance order has been updated and the initial compliance plan is due December 31, 2015. 5/5/2017-still going through start-up-had to replace a valve.1/31/2017-treatment installed and start-up began in Jan 2017. 6/27/2016: they want to use Isolex and have hired engineer to design plans. Self funding.

6/27/2016: proposing POE's and system would fund.

6/27/2016: plan is delinquent so enforcement is pending.

6/27/2016: They may not meet the July 2016 date since they are very interested in POE/POU, which our county is just now considering so they need to do the cost analysis. We will reevaluate plans due date when we get the selected option. 2/24/2016: is not part of a disadvantaged community. They are self-funding their project by increasing rates or special assessment. Their first milestone is:

- July 2016- determine preferred alternative – consolidation or treatment.
- Jan 2018-develop plans
- June 2018-implement compliance option

12/24/2015-They submitted initial compliance plan in September. They are researching treatment and intend to self fund. They are working with a vendor and hope to be part of a treatment study.

<p>6/27/2016: They are deciding between installing a new treatment plant or purchasing water from Washington School (next door and preferred option). Washington School is stalling on implementing treatment so updated enforcement is pending. 12/1/2015- Proposed solution has not been determined yet. 11/3/2015-treatment plant was working, but system removed treatment plant in July 2014 said too expensive to operate. New compliance order to be issued.</p>		
<p>5/5/2017-had issue after major February storm- March samples good. If May ok, BWO will be lifted. 1/31/2017-treatment plant under 10 ppb since July 2016- changes in coagulant feed and backwash seem to be successful. 5/11/16-April finished water was 32 ppb so plant is still having issues with maintenance. 3/7/2016:they are tweaking their treatment process (updating software to better control backwashes and just added a coagulant feed. The new compliance date is June 30, 2016. If the upgrades don't work, then we will send another compliance order (or citation). 1/29/15- added chemical feed and upgrading software/controls to improve backwash- next few months will indicate if successful. 12/1/2015-Will work with engineer to determine why it's not working. 11/3/2015-treatment plant not working to drinking water standards.- was working for a few months, but started failing again.</p>

Awaiting prop 84 construction funds. 5/5/2016: Issued NOV on 3/29/2016 and now are now in negotiations with the county. Fluoride and Uranium were also added as constitutes that were above the CA MCLs and were included as information only sinc the Fed EPA cannot enforce them. 3/8/2016-DDW has requested that EPA issued a compliance order. 2/18/2016-DE followed-up with San Bernardino County Special Districts, who operates the water system, about providing bottled water, and they discussed about applying through FFAST for the interim CAA emergency funds. The CSD have not been directed by the LPA to provide bottled water, so th DE gets the feeling they are hesitant to do so. The DW will keep the discussion going. There is a resolution to this in the works. Last year they completed a P84 planning project to design a 5-mile pipeline to the nearest WS, and DFA is reviewing their construction application now. They are hoping to get the FA out soon and start construction this summer. The DE didn't think he had a project where DFA was keeping the district office out of the loop, but this is one. He learned from DFA on Tuesday this week, that

01/25/2017 - Per Mark Magtoto of DFA (on 1/18/17) , the POU agreement is being reviewed by Daman Badyal and will be sent by the DFA analyst to Andrea Sissons of Warner School when ready. Per Andrea Sissons of Warner School (on 1/18/17) the signed funding agreement and attorney letter for the long term solution were to be forwarded to Brenda Pauli of DFA. 11/4/16 - Agreement No. D16-02007 was issued on 9/28/16 to Warner School from DFA for the permanent solution and included the transmittal Letter, Funding Agreement/Exhibits, signature pages and Draft copy of the General Counsel Legal Opinion Letter. The School Board approved the package and currently the legal general opinion form is being completed by School attorneys. The Clean-up & Abatement Fund agreement is being reviewed by DFA analyst. 6/15/2016 - Application for Clean-up and Abatement funds for interim solution was submitted in May 2016. Mark Magtoto of DFA indicated the application would not be considered since the engineering design from NV5 included a POE for the cafeteria building and not a POU as used in other schools with an Arsenic exceedance. A conference call between NV5, CRWA technical assistance provider, Mark Magtoto of DFA, LPA, Certified water operator, Warner School representative and DE happened in 6/2016 and addressed how to move forward. Engineer NV5 was to investigate the POU used at another school in the State and report back to the group. All documents have been submitted to Brenda Pauli of DFA to complete the application for funding for the long term solution. Application is under review and will take several months per Brenda Pali. 11/20/2015-The LPA had a conference call with Warner School today. Kyle, Brenda, Sean, Connie, Noel and the school were present. There are two items missing from the application to make it complete:

- Authorizing Resolution
- Schedule of System Obligations

The school board meets next on December 8th, at which time these items can be addressed. In the meantime the school will complete a Prop 84 application to request funds for bottled drinking water for staff/kids. The LPA is planning on visiting the site while the students are on winter break. At that time, or shortly after their visit, they will issue a revised Compliance Order that meets the approved State requirements. They will work with the DE or DDW

1/25/17 - Arsenic reduction plan is due to the LPA by 3/1/17 and will likely identify blending as the long term solution. LB Twin Lakes Resort has a total of 3 approved wells, 2 of which have been in stand-by mode for the past 4 years. Water quality results from Well 1 is currently being analyzed to determine if blending is an option. Well 7 is the source

## PROJECT INFORMATION

## PROJECT STATUS &amp; SYSTEM NOTES

5/4/2017: The water sytem is still operating on by-pass mode of the treatment system, Well 02 current RAA is in compliance with Arsenic MCL. System operator may propose partial treatment and blending if the RAA for Well 02 goes above the arsenic MCL. The water system will apply for permit amendment for addition of new well and possible treatment. 2/28/17: No status change from previous update. 2/1/2017: The arsenic levels in Well 02 and post treatment are being monitored monthly to determine both Raw and Treated water RAAs for compliance with the Arsenic MCL. Arsenic levels in both the raw (Well 02) and treated water have fluctuated above and below the MCL since initial testing began in August 2016. Since Well 02's installation and connection to the water system, the treatment process has been unreliably effective, with intermittent treatment failure. Because of this, the water system is currently under monthly public notification, which is updated to reflect the current levels of arsenic from monthly testing results and the status of the treatment system operation as reported by the Operator. The Operator is working with Culligan to determine why the treatment system may be failing intermittently. YCEH is waiting for a final assessment of the treatment system from the Operator and Culligan pending their findings. The system is currently operating on by-pass mode from the treatment system. The raw water results (Well 02) for the month of December showed arsenic levels at 9.1 mg/L. 12/22/2016: The Yolo Fliers Club treatment system has not yet been RTC. Since the installation of treatment earlier this year, Well 01 failed and Well 02 was installed. The arsenic levels in Well 02 and post treatment are being monitored monthly to determine both Raw and Treated water RAAs for compliance with the Arsenic MCL. Arsenic levels in both the raw (Well 02) and treated water have fluctuated above and below the MCL since initial testing began in August 2016. Since Well 02's installation and connection to the water system, the treatment process has been unreliably effective, with intermittent treatment failure. Because of this, the water system is currently under monthly public notification, which is updated to reflect the current levels of arsenic from monthly testing results and the status of the treatment system operation as reported by the Operator. The Operator is working with Culligan to determine why the treatment system may be failing intermittently. YCEH is waiting for a final assessment of the treatment system from the Operator and Culligan pending their findings. The system is currently

5/4/2017: Water system is operating on full treatment mode with no blending. No sample results recieved arsenic monitoring during 1Q2017, M&R citaiton issued to water system on 4/24/17. 2/28/2017: Permit Amendment issued 2/16/17. RTC pending based on RAA of treated water. 2/1/2017: Treatment was installed in September 2016. Water system is blending raw water with treated water to meet water demand for facility. Water analyses post treatment for 3Q2016 and 4Q2016 show levels < 50% MCL. Final blended water levels of Arsenic are not below the MCL. The water system is currently under public notification and has three POU devices which are installed on a temporary basis for MCL compliance. Sampling post POU's show levels of arsenic < 50% MCL. 5/5/2016: EPA had a conversation with the LPA to discuss a possible issuance of a NOV, but as time went on the water sytem submitted water quality data for the past year and has proposed to install treatment by 6/30/2016. EPA will follow-up with the LPA for a status update. 8/8/2016: Water system requested a 60 day extension for implementaion of the treatment plan for contracting and funding reasons. New deadline for treatment implementation is 8/31/2016. 4/18/2016-A letter of commitment was received in April, 2016 with implementation of the treatment plan by 7/1/2016. 2/2016- Engineering report received

POU installation using P84 Part 1 grant funding

Going from groundwater well to a surface water system

[illegible]

**9/22/15** - Treatment plant went on line 8/25/2015. Going to take a raw water sample to show compliance with the Arsenic standard. Moved intake downstream where arsenic level is below standard. Project also involved replacing the surface water treatment plant at a new location. Once sufficient monitoring has taken place the system will be returned to compliance.

**7/2/2015** - Treatment plant construction well underway. Currently project completion is projected to be the end of September 2015 and the system producing water with arsenic levels below the MCL.

9/21/2015: RTC - Sept 2015; As trt installed. CO issued Q1 2015

Commissioning of the treatment plant is in progress. 100% completion of the project is expected before June 30, 2015. 2/13/15 (JSD): A new well drilled to replace failed Well No. 1 and adsorption arsenic treatment being installed. Project completion deadline of May 21, 2016 according to the P84 funding agreement.

Treatment plant completed along with initial testing phase.

8/02/2016 Permit Amendment was received to inactivate East Well from the water system. 4/28/2016 No status change from previous update. Public Notification Provided. West Well; currently has a 4 quarters RAA under the MCL, therefore has returned to compliance. However, east well still over MCL. East well is only standby, however. Still connected to system though.

8/3/2015 (JD): PWS had their treatment on-line starting in September 2014. So the plant effluent is <10ppb but the RAA was > MCL as of the 1st quarter 2015. It is anticipated that after the 3rd qtr 2015 the RAA is < MCL.

Continue quarterly sampling to monitor arsenic levels and report in CCR.

Water System put new source online. Well #1 is now being used as a backup well and is not interconnected. Treated water sample for 11/16/15 was 5.3 ppb

Proposed piloting treatment but vendor nonresponsive. **7/29/15 update:** 4QRAA = 7 ug/L. Will RTC if they maintain QRAA < MCL for four full quarters. System continuing to look at piloting treatment. **9/17/15 update:** 4QRAA = 3.7 ug/L. Will RTC if this trend continues. 12/8/15 4QRAA < MCL for 5 consecutive quarters based on reduced source water quality arsenic concentrations. RTC effective 12/8/15.

System is currently still at 10 ug/L running annual average. They will continue to collect quarterly samples and provide sample data in their CCR's.
